Who’s controlling the air you breathe?

Right now, the quality of your air is controlled by Big Tobacco and state politics in Baton Rouge. Old state laws prohibit your community from passing ordinances that protect your right to breathe clean air in public places and workplaces.

But that can change. The Louisiana State Legislature is considering a bill called SB 901 that would restore local control so your community can protect its residents from secondhand smoke. Call your legislators and tell them to vote YES on SB 901.

It’s your air. Shouldn’t you be able to control it?
